

A systemic social work practice system

- **Everyone in the organisation at every level is interested in practice and what's going on on the front line**
- **A core belief system and model of practice which is shared across the system**
- **Skilled and knowledgeable practitioners - expertise**
- **Relationships**
- **Feedback – what happened next**
- **Time to do the work**
- **A good balance between activities that matter and those that don't**
- **There is no single story**
- **Write less, think more, talk more**
